

National schemes for energy efficiency in SMEs

Deliverable 4.7 - Public

Intermediate Monitoring Report

Implementing the DEESME campaign for energy efficiency

Authors: Giulia Pizzini, Ivana Rogulj (IEECP)

Project information

Project Title	Developing national schemes for energy efficiency in SMEs
Project Acronym	DEESME
Project Number	892235
Project coordinator	IEECP, Ivana Rogulj, <u>ivana@ieecp.org</u>
Project dates	September 2020 – August 2023

Deliverable information

About

Unlike large companies, SMEs have less technical human and financial resources to improve their energy efficiency. Barriers have been deeply investigated including lack of awareness, low capital, difficulty to access financing, doubts around actual saving potential and the lack of technical human resources. To provide SMEs with technical resources such as methodologies, best practices, technology inventories and subsidies, national schemes exist. Some of the schemes introduce mandatory actions (energy analysis) to obtain such subsidies. Nevertheless, national policy schemes have failed to some extent to convince companies that the energy audit is something more than a "bureaucratic fulfilment" to obtain a contribution and to push large companies to take the step from the analysis to the investment. To overcome that, DEESME aims at:

a) Enabling companies to manage the energy transition by taking profit of multiple benefits and energy management approaches,

b) Supporting the development and implementation of energy efficiency EU policies in the framework of article 8 of the Energy Efficiency Directive, beyond the project, by providing national authorities with guidelines and recommendations on how to strengthen the national schemes, and

c) Enhancing the adoption of the DEESME approach by National Authorities beyond the project timeline through the implementation of institutionalization activities.

The project will identify and share best practices from national schemes, EU projects and other initiatives with national authorities and support them in developing more effective schemes dealing with energy audits and energy management systems. It will finally assist SMEs to develop and test the technical DEESME solutions by organizing information and training initiatives, realising energy audits and implementing energy management systems starting from international standard and adding the multiple benefits energy efficiency approach.

The project is built on a strong consortium of academics, research organisations, consultancies and government offices from Belgium, Bulgaria, Germany, Italy, the Netherlands and Poland, namely: IEECP (NL, coordinator), FIRE (IT), SOGESCA (IT), Fraunhofer ISI (DE), CLEOPA (DE), SEDA (BG), ECQ (BG), KAPE (PL), EEIP (BE).

The project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 892235.

1. Introduction to the monitoring strategy of Work Package 4

According to the DEESME proposal, each work package (WP) includes its dedicated monitoring activities. Work package 4 (WP4) of the project aims at implementing the DEESME campaign for energy efficiency in four EU countries: Bulgaria, Germany, Italy and Poland. This work package is focused on increasing the attractiveness of the solutions adopted by DEESME during the implementation of WP3 "Enabling companies to take profit of multiple benefits and energy management approach". After collecting and analysing the results obtained from the implementation of 50 energy audits and 25 energy management systems using the multiple benefits approach within WP3, consortium members will seek to reach out to 50 project key actors and 2500 companies in order to raise the awareness of companies on the DEESME approach. The DEESME Campaign for Energy Efficiency will further strive to encourage a wider number of companies to invest in energy saving measures, hence declining energy consumption trends and reducing energy demand in different sectors.

The specific objectives of the work package are:

- test the attractiveness of the solutions adopted by DEESME to encourage companies towards energy efficiency
- involve at least 2500 companies (minimum 500 in each of the 4 DEESME MS) by the end of the project, either directly (e.g. phone-calls and trainings) or indirectly (e.g. newsletters)
- involve at least 10 national trade associations and other key actors in each country
- provide the Institutionalization process (WP5) with working documents based on real scale and key actors points of view

The monitoring activities in WP4 are to find out to what degree these specific objectives have been reached and to identify opportunities for improvement of the further implementation of the project. In other words, task 4.4 (T4.4) is to monitor the results and impact of the work package (Figure 1).

Figure 1 – WP4 monitoring strategy

This intermediary monitoring report shows the state of play of the campaign (and specifically on the indicators of this work packages) half way through it.

Due to some delays in the implementation of the campaign itself – mainly due to Covid19 – the submission of this deliverable has been slightly postponed.

2. Summary of key performance indicators (KPIs) and data requirements

According to the project proposal, the DEESME project shall attain a set of different key performance indicators within and beyond its duration. The overall set of indicators addresses different parts of the

project. Some of them relates to the activities carried out in WP4 (Table 1, summary of WP4 DEESME indicators)

Projec	ct Performance Indicator	Quantification	Measurement unit
	ators related to the DEESME nunication campaign	within project duration	
#1	Key actors with increased skills/capability/competencies with reference to multiple benefits and management (T4.1)	50 (10)	number/consortium (minimum number/country)
#2	Companies addressed during the DEESME campaign (T4.1)	2500 (500)	number/consortium (minimum number/country)
#3	Meetings with key actors (T4.1)	8 2	number/consortium number/country
#4	National events with companies (T4.2)	8 2	number/consortium number/country
#5	Training sessions and workshops with key actors and companies (T4.3)	12 3	number/consortium number/country

Table 1 – summary of WP4 DEESME indicators

3. Reporting on indicators

3.1. Indicator #1: Key actors with increased skills/capability/competencies (T4.1)

3.1.1. Overview

Prior to identifying the data needed to monitor the KPIs, it is important to understand how the target is defined.

According to the Grant Agreement, 50 key actors will be directly involved within the project, and their skills/capability/competencies will increase during the project.

According to <u>D4.1 – Plan of the Communication Campaign</u>, key actors are defined as "various individuals, groups or organizations that are directly involved in the DEESME communication campaign with the aim to encourage companies to invest in energy efficiency based on the DEESME approach". A non-exhaustive list of such key actors include: trade companies' associations, consortia and other companies' aggregators; energy consulting and certification firms; energy agencies; research organizations and universities; financial actors; regional and other relevant local authorities; media & press; general public.

Quantitative indicator: 50 key actors in total (minimum 10 per DEESME pilot country) **Qualitative indicator:** skills/capability/competencies will increase

3.1.2. Data collection

Quantitative indicator

All national technical partners are required to fill in the Key Actors' Register – Annex 1 of Deliverable 4.1 (D4.1) – Plan of the communication campaign. Bi-monthly (at the end of every odd month), national technical partners are required to send the key actors' registers (table 2) to IEECP. IEECP will keep track of anonymized Key Actors in the General Key Actor register (table 3), in order to monitor the achievement of DEESME KPIs. Updated General Key Actors' Register will be included in Deliverable 4.7 (D4.7) - Intermediary monitoring report - Implementing the DEESME campaign for

energy efficiency (Task 4.4, IEECP) - month 27; and Deliverable 4.8 (D4.8) Final monitoring report on the attractiveness of DEESME approach - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 36.

1				
2				
3				

Table 3 – Sample of the General Key Actors register (Annex I)

3.1.3. Interim results

By the end of 2022, the total number of key actors involved was 73, which means that the general KPI of 50 key actors involved overall was reached. The KPI was also reached in all 4 DEESME countries where more than 10 key actors were involved.

As it can be clearly seen in the Annex I – General Key Actor Register January 2023 – the state of play is the following:

Country	Number	/
Bulgaria	12	4 Universities or Research Organisation, 2 Financial Actors, 2 consortia of companies, 1 Energy consulting firm and 1 aggregator of companies, on top of an Agency of the Bulgarian Ministry of Economics in charge of industry and SME management, and 1 energy expert
Germany	11	6 Companies' associations, 2 Energy Consulting Firms, 2 Initiatives (Initiative energy efficiency networks – IEEN and Cluster Energietechnik Berlin Brandenburg), 1 Energy Agency.
Italy	35	34 Trade companies' associations and 1 University
Poland	15	9 Company aggregators, 3 regional authorities, the Ministry for Climate and Environment, 1 spokesman for SMEs and 1 Energy Consulting Firm.
TOTAL	73	

Qualitative indicator

IEECP developed a simple survey in English which will be automatically translated into Bulgarian, German, Italian and Polish. National technical partners are collecting the survey from key actors who are participating in the working sessions (see indicator #5) organised in each of the 4 DEESME pilot

countries. IEECP is in charge of monitoring responses and analysing the data. Results will be included in D4.8.

3.2. Indicator #2: companies addressed during the DEESME campaign (T4.1)

3.2.1. Overview

According to the Grant Agreement, the consortium is committed to involve at least 2500 companies in the 4 DEESME pilot countries (with a threshold of minimum 500 companies per country) in a communication campaign.

Figure 2 – the four steps of the engagement process

The process for the involvement of companies consists of four steps, as graphically reported in figure 2: initial search and screening; identification & selection; establishing contact; engagement in the DEESME campaign.

Quantitative indicators:

- 2500 companies in total (at least 500 per DEESME pilot country)
- 20 newsletters and similar documents (at least 5 per DEESME pilot country)
- 5 web content published on websites (DEESME official website + the website of each national technical partner ECQ, CLEOPA, SOGESCA, KAPE)

3.2.1. Selection of companies

Each country autonomously decide which companies to engage and how to engage them.

In **Bulgaria**, companies were approached through several channels:

1) Direct: ECQ has direct link with more than 100 companies in various sectors of the economy and contacted them for the DEESME campaign implementation. Furthermore, ECQ has a database with company contacts gathered from various public registers and events and used it to send them information regarding the campaign.

2) Indirect: ECQ exchanged a number of emails and phone calls with key actors aimed at securing their support in contacting companies. Both ECQ and SEDA had contacted key actors with regards involving both them and companies they are in touch with in campaign through their network. A total of 2000

stakeholders, the majority of which companies, were contacted throughout the campaign implementation in Bulgaria.

In **Germany**, Cleopa coordinates the Cleopa Energienetz with more than 10.000 companies, whose members are commercial (entities SME). Having in mind the dissemination effect of DEESME Cleopa addressed all of them by paper newsletters with attractive information about energy efficiency, grants and funding and cooperation opportunities. In one of those newsletter more than 500 companies were selected and targeted with the DEESME information. All those companies had already business contact before and were also selected as multipliers towards more SMEs on their own customers lists.

In **Italy**, the company selection was based on existing direct relationships with SOGESCA. Moreover, SOGESCA liaised with partners operating in the same consulting services sector but with a slightly different focus, for example consultants working more on the incentives available for energy efficiency and other companies' investments rather than on technical energy consulting services to extend the reach of the communication campaign. Finally, SOGESCA and FIRE reached out to key actors like sector associations and involved and actively engaged in them in the campaign in order to illustrate the DEESME multiple benefit approach and ensure their role as knowledge multiplier towards associated companies. FIRE extensively published articles on DEESME on the FIRE newsletter.

In **Poland**, when selecting companies, KAPE benefited mainly from cooperation with companies' associations and aggregators. These associations are located in different parts of the country and each of them has a large base of enterprises from its own region. Associations provided information about the project directly to the associated companies. In addition to companies that were informed about the project by companies' associations, KAPE also benefited from its existing contacts, which are the result of activities in projects including SMEs.

3.2.2. Data collection

All national technical partners are required to note down all the communication sent to companies in the Communication Campaign Company Register (Table 4) and send it bi-monthly to IEECP who will keep track of anonymized data in the General Communication Campaign Company Register (Table 5), in order to monitor the achievement of DEESME KPIs.

No	Name of company	Type ¹ (drop- down menu)	Sector	(If network) Number of affiliates	Name and surname of contact person/s	Contact details (e- mail/phone number)	Mean of contact (drop-down menu) ²
1							
2							
3							

Table 4 – Sample of the Communication Campaign Company Register (Annex II)

No	Name of company	Type ² (dropdown menu)	Sector	N	Mean of contact ³	Responsible partner (country)
----	-----------------	---	--------	---	------------------------------	-------------------------------------

¹ Micro, Small, Medium, Large company

² Direct email, newsletter, phone-call, in-person meeting

Table 5 – Sample of the General Communication Campaign Company Register (Annex III)

Moreover, national technical partners will collect and share with IEECP (on a bi-monthly basis, at the end of every odd month) the newsletters sent in the framework of the communication campaign. IEECP will collect them and include them in Deliverable 4.7 (D4.7) - Intermediary monitoring report - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 27; and Deliverable 4.8 (D4.8) Final monitoring report on the attractiveness of DEESME approach - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 36.

3.2.3. Interim results

By the end of 2022, a total of 1639 subjects were reached via the DEESME campaign, of which 1631 companies and 8 networks, representing more than 630,000 additional companies. This means that the general KPI of 2500 companies reached was greatly overachieved. The KPI was also reached in all 4 participating member states.

As it can be clearly seen in the Annex II – General Communication Campaign Company Register January 2023 – the state of play is the following:

Country	Number	Notes
Bulgaria	1085	Accommodation and food service activities (5), Administrative and support service activities (2) Association / NGO (40) Audit (3) Business consultancy (1) Chamber of Commerce (13) Cluster (2) Construction (12) Construction mechanization (1) Consultancy (15) Counselling (2) Design (1) Digital technologies for industry sector (2) Distributive trades (15) District administration (1) Economy policy think tank (5) Education / NGO (8) Embassy (15) Energy Sector (301) European authority (2) Expert (1) Financial services (13) Forestry (1) Gas transportation (3) Geographic Information Systems (4) Hospital (1) Industry (1) Information and communication services (3) Information Technology (1) Insurance services (3) IT Consulting (2) Legal counsel (30) Legal services (1) Local authority (59) Management consulting in the energy sector (4) Manufacturing (92) Manufacturing of monitoring devices (1) Media (209) Media monitoring (2) Metal industry (1) Mining (3) Ministry (34) Monitoting and analysis of macroeconomy (2) National Agency (1) National Authority (30) National Commettee (1) Network (1) NGO (19) Nuclear plant (5) Online media (1) Packaging industry (1) Policymaker (4) Political party (9) Precious metals (1) Printing (1) Public Financial Sector (9) Public sector (6) Radio (1) Railway transport (3) Real estate activities (1) Research (3) Research and monitoring (8) Science (1) Statsitics institute (1) Steel manufacturer (3) Technology (2) Telecommunications (2) Tour operator (1) Trade (21) Trade union (3) Translation services (1) Transport (3) Transportation and storage services (2) Union (2) University (19) Wood processing industry (3)

TOTAL	1639	

3.3. Indicator #3: Meetings with key actors (T4.1)

3.3.1. Overview

According to the Grant Agreement, 2 meetings per country will be organized, with the aim of consolidating relationships with key actors and of improving the communication towards companies,

Quantitative indicators:

• 2 meetings with key actors organized per DEESME pilot country - 8 meetings in total

3.3.2. Data collection

Each national technical partners is committed to organise at least 2 meetings with Key Actors in each of the DEESME pilot countries. National technical partners will share data on these meetings with IEECP, who will collect all the material and include anonymised information in Deliverable 4.7 (D4.7) - Intermediary monitoring report - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 27; and Deliverable 4.8 (D4.8) Final monitoring report on the attractiveness of DEESME approach - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 36.

3.3.3. Results

By the end of 2022, meetings with Key Actors have been organised in all 4 DEESME countries. In particular:

BULGARIA ECQ organised four meetings (on 5/1, 12/2, 18/3 and 8/4) in 2022 with the "Club 9000" association which counts more than 600 members in Bulgaria.

GERMANY

Cleopa presented the DEESME MB approach at two edition of the EU Green Week, in 2021 (link to the event page <u>here</u>) and 2022 (link to the event page <u>here</u>), with a total of 211 attendees.

ITALY

Sogesca and FIRE organised collectively 17 meetings with key actors between January 2021 and November 2022, and reached a total of around 140 participants.

POLAND

KAPE organised two meetings with Key Actors, one in December 2020 with 11 participants and 2 key actors and one in October 2021 with 140 participants and 8 key actors (here is the <u>event page</u>).

3.4. Indicator #4: National events with companies (T4.2)

3.4.1. Overview

According to the Grant Agreement, building on the relationships with key actors, 2 meetings per DEESME pilot country will be organized with companies, to present the DEESME idea and the DEESME multiple benefits approach. In total, 500 companies will directly participate in national events in the 4 DEESME pilot countries (at least 100 per country).

Quantitative indicators:

- 2 meetings with companies organized per DEESME pilot country 8 meetings in total
- 500 companies participating in the national events (at least 100 per DEESME pilot country)

each of the DEESME pilot countries. National technical partners will collect and share with IEECP who will collect all the material and include anonymised information in Deliverable 4.7 (D4.7) - Intermediary monitoring report - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 27; and Deliverable 4.8 (D4.8) Final monitoring report on the attractiveness of DEESME approach - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 36.

3.4.3. Interim Results

By the end of 2022, meetings with Key Actors have been organised in all 4 DEESME countries. In particular:

BULGARIA

So far, ECQ presented DEESME in one national event at the end of November 2022. Over 100 participants in physical presence and more than 30 online. The agenda of the meeting can be found in the Annex III.

GERMANY

Cleopa held two national events: the Cleopa Global Recycling Day (39 attendees) and the Brandenburg Energy Day (300 attendees). Agendas can be found in the Annex III.

ITALY

SOGESCA presented DEESME in one national event in Italy on the 17 November. Details can be found <u>here</u>.

POLAND

KAPE presented DEESME in three national events:
One online session of the EUSEW on the 26 October 2021(here) with 14 companies participating;
One in person session at the Second National Round Table on Financing Energy Efficiency in Poland (here) attended by 91 participants (11 companies);
One in person session at the IV Radomsko Entrepreneurship Forum
"Where is the economy going?" (here) attended by 34 participants (12 companies)

3.5. Indicator #5: Working sessions with key actors and companies (T4.3)

3.5.1. Overview

According to the Grant Agreement, information, training sessions and workshops (3 working sessions per country) will be organised to keep the involvement and attention high and to gather added value elements from the participant organisations.

Quantitative indicators:

• 3 training sessions with key actors and companies organized per DEESME pilot country – 12 workshops in total

3.5.2. Data Collection

Each national technical partners is committed to organise at least 3 training sessions and workshops with key actors and companies in each of the DEESME pilot countries. National technical partners will collect and share with IEECP who will collect all the material and include anonymised information in Deliverable 4.7 (D4.7) - Intermediary monitoring report - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 27; and Deliverable 4.8 (D4.8) Final monitoring report on the attractiveness of DEESME approach - Implementing the DEESME campaign for energy efficiency (Task 4.4, IEECP) - month 36.

3.5.3. Interim results

By the end of 2022, meetings with Key Actors have been organised in all 4 DEESME countries. In particular:

BULGARIA One event was held in Bulgaria (see Annex IV).

GERMANY One event was held in Germany (see Annex IV).

ITALY Three events were organised by FIRE and SOGESCA (see Annex IV)

POLAND Two events were organised in Poland (see Annex IV)

4. Annex I – General Key Actors Register

N				0
No	Name of Key actor	Type of key actor	Other type of key actor (describe)	Country
1	Energy Efficiency and Renewable Sources Fund (EERSF)	Financial Actors		Bulgaria
